

Announcement: CTDI Acquires AccessNode Product Family

March 5, 2008

West Chester, PA: Communications Test Design, Inc. (CTDI) is pleased to announce that we have acquired the AccessNode product family from Zhone Technologies, effective December 28, 2007. This includes the AccessNode, AccessNode Express and the UE 9000 products. Moving forward, CTDI will provide AccessNode customers with world-class service and support including new product manufacturing, design, repair and return services and 24x7 technical support.

These services will leverage CTDI's extensive product sustainment expertise which is supported by 38 global facilities and over 3,700 telecom employees. CTDI has in-depth experience acquiring, transitioning and supporting Telecom products. Since 2001, CTDI has acquired and supported several OEM product lines such as Nortel's Async, IADs and DSLAM products. CTDI also acquired GoDigital as well as the eLuminant product family. These acquisitions, coupled with CTDI's engineering design expertise, have created a powerful and comprehensive product service portfolio. This includes our Fiber Optic product family which includes WDM Couplers, Patch Cables and ADSL2+ extension products for triple play deployment.

As with all the products CTDI manufactures, we are fully committed to servicing and supporting the AccessNode product line. For repair or technical support issues please call 615-884-7455. For product ordering inquiries please call Anton Kaeslin at 610-793-8848 or Sam Fadlallah at 514-893-3538.

Thank you for selecting the AccessNode product line for your network. CTDI looks forward to servicing all your current and future AccessNode product needs.
